

Biological pipe cleaning

The advantages

» **Pipings**

Lipolyt® 2000 has been developed for all pipe materials.

» **Deposits**

Lipolyt® 2000 prevents incrustations or decomposes existing incrustations.
therefore the danger of blockages is reduced considerably.
therefore the pipe ventilation is improved, which reduces possible odour problems.

» **Sulphuric acid**

Lipolyt® 2000 reduces drastically the danger of corrosion due to biogenic sulphuric acid, which is caused by organic materials

» **Pipe cleaning**

Lipolyt® 2000 is the alternative to expensive pipe cleaning which might damage the pipe materials

Biological pipe cleaning can be used both as a preventive measure in new pipelines and for pipe cleansing in older pipelines.
